

As an expert in sterilization, we treat products mostly from the health sector.

As an expert in cross-linking, we transform plastic materials to obtain high technicality products.

This dual expertise enables us to be an international industrial player satisfying the highest quality and service requests.

In order to implement our Sustainability strategy, we have taken strong commitments towards our stakeholders and we strive to respect them on a daily basis.

 Create a great place of work Work safely Maintain our effectiveness and continuously improve our processes and practices Grow skills and foster professional development Enable internal mobility and limit turnover Involve employees Promote the values of the company 	 Listen to our clients Develop and value the service offering Focus on long-term contracts Guarantee the quality of our service Increase our production capacity to meet the growing demand of our customers Be innovative 	 Build long-term partnerships Secure strategic supplies Promote our commitment to sustainability with our suppliers 	 Proceed with an ethical manner Comply with regulations Communicate actively and transparently Ensure regulatory and normative compliance 	 Create value Ensure financial profitability Structure the governance of the company Promote the company's image Develop the company's growth through acquisitions or greenfields 	 Reduce our environmental impact Promote "green" actions on a daily basis Manage industrial projects in a sustainable manner with an environmental approach Integrate into local life Prevent pollution risks
Employees	Customers	Suppliers	Authorities	Shareholders	Planet

As President of the Group, I am personally committed, on behalf of the entire management team, to deploy the human, technical and organizational resources necessary to meet all those commitments.

Herkens Christoph (26/11/2021) President
